Profile

A highly motivated professional pivoting to Cyber Security. I bring hands-on experience in data resilience and security assessment, coupled with a strong foundation in risk mitigation and legal policy analysis.

Experience

Cybersecurity Specialist & IT Administrator | Paestum Resorts | June 2024 - December 2025

- Proactively established a data storage and resilience strategy by personally designing and deploying a RAID 5 Network Attached Storage (NAS) system for sensitive business and customer data.
- Conducted initial system security assessments of new IT infrastructure (POS/ticketing), including testing device encryption against network monitoring tools to ensure data protection.
- Managed end-to-end IT setup, including the rapid deployment and configuration of essential network infrastructure.
- Led the project lifecycle, coordinated and supported cross-functional teams of up to 30 personnel to achieve project goals.

Certifications

Harvard University | 2025

- Computer Science (CS50) & Introduction to Cybersecurity (CS50x)
- Developing a final project with the focus on Cybercrime applying foundational knowledge in algorithms, data structures, and security paradigms

CompTIA Security+ | 2026

- Industry-standard certification that validates foundational cybersecurity skills
- CompTIA Security+ covers essential cybersecurity concepts including threats, security architecture, implementation, incident response, and risk management.

CompTIA A+ | 2026

- industry-standard certification that validates foundational IT skills
- covering a broad range of topics like hardware, software, networking, security, and troubleshooting.

Education

KU Leuven | Leuven, Belgium | 2023-2024

- Completed first-year of BA Law & Politics.
- Multidisciplinary program at leading EU research university.

Skills

- **Technical:** Python, react, Linux (Kali, Arch, Mint), MacOS, Windows, Virtual Machines, Burpsuite, nmap, wireshark, SQL, Metasploit, Adobe suite, Network attached storage, Abacus, Azure, Digital tools and system troubleshooting.
- **Languages:** English (C2), Italian (C1), French (C1), Basic Indonesian.
- **Interpersonal:** Technical understanding, Team leadership, calm under pressure, cross-cultural communication, independent decision-making.
